Droid Sans Pro

Table of Contents

Droid Sans Pro

Droid Sans Pro is a humanist sans serif typeface designed by Steve Matteson, Type Director of Ascender Corp. The Droid Sans Family is an approachable, friendly set of typefaces optimized for display on screen.

Droid Sans was designed to provide optimal quality and legibility. It features upright stress, open forms and a neutral appearance. Droid Sans was optimized for user interfaces and to be comfortable for reading on a mobile handset in menus, web browser and other screen text.

The Droid Sans Pro Regular font contains Old Style Figures (requires an application that support advanced OpenType typographic features) and extensive character set coverage including Western Europe, Eastern/Central Europe, Baltic, Cyrillic, Greek and Turkish support.

619 **Oldstyle figures**

These figures are designed with ascenders and descenders and have features and proportions compatible with the lowercase characters of the typeface. Included are Tabular Oldstyle figures.

0123456789

123 **Proportional Lining Figures**

Most fonts include lining figures that are designed to be compatible with the capital letters. Fonts with proportional lining figures include a set of lining figures that have unique widths that are determined by the shape of the figure. Proportional lining figures are preferred when setting certain text, such as an all-capital headline.

0123456789 (Proportional Lining)

About the Designer

STEVE MATTESON is the Director of Type Design for Ascender Corporation and has created fonts for use in various screen display environments and print publishing since 1987. A graduate of Rochester Institute of Technology, Steve has an extensive background in typography, design and printing which he has applied to his development of high quality typefaces.

His work can be found in user interface designs (such as Windows Vista, Xbox 360, Zune, and Google s Android Platform); in publishing (such as Pescadero Pro, Andy and Endurance Pro); and for corporate branding (such as Symantec, Microsoft and Alcon Labs). He resides in Louisville, CO with his wife, two kids and two Labrador Retrievers.

Steve is involved with a charitable program called "Hope for Grieving Children" – an orphan counseling program started by his father Dr. Richard Matteson in Zambia, Africa. The program teaches pastors, educators and counselors how to care for the over 800,000 orphans in Zambia. The program is also expanding to provide meals and education to these children who are otherwise likely to wind up living on the streets.
